

## Week 6 - Animal Biology at Home Learning - Week of 4/27/2020 - 5/1/2020

### *Overview and House Keeping Notes:*

1. The first half of this week you are working on completing your Technical Communication Project. If you need help dividing up your work for the week, then please email me to set up time to chat virtually. The project will be due by end of day on Wednesday 4/29.
2. Looking Ahead...On Thursday 4/30 we will begin a short unit on vertebrates. The class filled out a survey a few weeks ago where the overwhelming choice was to shorten the vertebrate unit since we could not complete the pig dissection in the lab. We will have a required check-in quiz at the end of the vertebrate unit and then move on to Human Evolution which will be the final unit for the year.

### STUDENT WORK FOR 4/27 - 5/1

Monday 4/27 - Work on technical communication project.

Tuesday 4/28 - Work on technical communication project.

Wednesday 4/29 - Free Day. No new work or time to finish up the dissection if needed. I will not be available on this day, so make a plan to contact me Monday or Tuesday if you have questions.

Thursday 4/30 - Begin Vertebrate unit

Friday 5/1 - Continue Vertebrate unit. This is PLP day, so Kris will not be available to answer questions.

4. A parent link to the common OneNote pages is here:
